DETAILED ACTION

1. This action is in response to applicant's amendment received on 8/11/03.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4-5 and 7-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Myover in view of Schmitt.

Myover discloses the invention substantially as claimed including elements/brushes 20, a bearing plate 19 and a drive 18. Myover does not show a slitting device, a suction zone, an opening, a suction device and a vacuum box. However, Schmitt teaches the use of a slitting device 56, a suction zone 12, an opening (see Fig. 1), a suction device 44 and a vacuum box 40 for the purpose of cutting the paper and collecting air bone dust. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Myover's device by providing the suction zone, the opening, the suction device and the vacuum box as taught by Schmitt in order to obtain a complete cut of the paper and removable of air bone dust from the cutting zone.

Response to Arguments

4. Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Schmitt in combination with Myover do not teach "deflection elements deflecting other elements" and "dust collector in contact with the brushes". It is noted that the features upon which applicant relies are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Also, Myover teaches deflection elements (18 and 19) deflecting other elements (see Fig. 1, where the contact between the brushes cause the deflection).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
